July 3, 2015

Mr. Jeffrey Kaufman

Somerville, MA.

Clean Harbors responded to a mercury spill @ the above address on 7/2/15. Our Foreman George Falzarano who is experienced with a Jerome meter took readings and the first and second floor were reading 0 on the meter. The third floor also read 0 except for the small room that had the initial spill. There were still areas in that room that were .037 milligrams per cubic meter. That area is still contaminated and will be cleaned on Monday. These readings were taken on 7/2/15 at approximately 5:40PM

Sincerely
CLEAN HARBORS ENVIRONMENTAL SERVICES, INC.
